## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Species A in the reply filed on 9/5/08 is acknowledged. The traversal is on the ground(s) that there is a common special technical feature (STF), i.e., that which is described in the 1<sup>st</sup> 12 lines of claim 1. This is not found persuasive because the 1<sup>st</sup> twelve lines of claim 1 were already successfully rejected in 10/11/07 non-final Office action and Applicant did not successfully refute the rejection of the 1<sup>st</sup> 12 lines of claim 1 made in the said 10/11/07 non-final Office action. The prior art establishes that the 1<sup>st</sup> 12 lines of claim 1 is not a special technical feature.

The requirement is still deemed proper and is therefore made FINAL.

Claims 15-20 are therefore withdrawn due to being drawn to nonelected Species B.

Furthermore, it is noted that in U.S. Application 10/579,736, Applicants elected configuration 1. In light of the fact that instant application serial no. 10579739 has such similar claimed subject matter to serial no. 10579736, it has been determined that an additional restriction of the Species A claims in said instant application 10579739 (herein '739) is appropriate in order to ensure claims in both said applications are examined properly/consistently and to ensure that there are no violations of MPEP chapter 822. Therefore elected Species A is further restricted as follows:

This application contains claims in elected Species A (see above) directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Art Unit: 2883

The species are as follows:

Species A1. configuration (1)

Species A2. configuration (2)

Applicant is required, in reply to this action, to elect a single species (e.g., A1 or A2) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 1, 2 contains both of the above species A1, A2.

The following claim(s) are generic: currently no claim is generic to all species.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The special technical feature of perpendicular relative positions is clearly different than the special technical feature of parallel relative positions and/or the output side is clearly a different position than the incident side.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 2883

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Applicant is further advised that election of species A1 will probably result in double patenting rejections (see also MPEP Chapter 822).

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
